Gainesville, FL 32611

Editorial Production, John Wiley: Elizabeth A. Wilber

The *Journal of Computational Chemistry* (ISSN: 0192-8651) is published 16 times a year, monthly and semi-monthly in January, April, July, and November, one volume per year by John Wiley & Sons, Inc.: 605 Third Avenue, New York, NY, 10158.

Copyright © 1996 John Wiley & Sons, Inc. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under section 107 or 108 of the 1976 United States Copyright Act, without either the prior written permission of the publisher, or authorization through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923; tel: 508-750-8400, fax: 508-750-4470. Periodicals postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice in the journal indicate the copyright holders consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 and 108 of the United States Copyright Law. The per-copy fee for each item is to be paid through the Copyright Clearance Center, Inc.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (Volume 17, 1996): $896.00 in US, $1,056.00 in Canada and Mexico, $1,144.00 outside North America. All subscriptions outside US will be sent by air. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. For subscription inquiries, please call 212-850-6645; E-mail:SUBINFO@jwiley.com

Postmaster: Send address changes to *Journal of Computational Chemistry*, Susan Malawski, Director, Subscription Fulfillment and Distribution, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. For subscription inquiries, please call customer service at 212-850-6645 or write to the above address.

Advertising: Inquiries concerning advertising should be forwarded to Susan Levey, Advertising Sales, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. 212-850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO 19 1UD, England.

Reprints: Reprint sales and inquiries should be directed to the customer service department, John Wiley & Sons, Inc., 605 Third Ave., New York, NY 10158; tel: 212-850-8776.

Manuscripts should be submitted to one of the editors: Dr. Norman L. Allinger, *Journal of Computational Chemistry*, Department of Chemistry, The University of Georgia, Athens, GA 30602; Prof. Dr. Paul von R. Schleyer, *Journal of Computational Chemistry*, Computer Chemistry Center, Institut für Organische Chemie, Universität Erlangen-Nürnberg, Henkestr. 42, D-91054, Erlangen, Germany; or Prof. Gernot Frenking, *Journal of Computational Chemistry*, Fachbereich Chemie, Philipps-Universität Marburg, Hans-Meerwein-Strasse, D-35032 Marburg, Germany. *Information for contributors* appears in the first and last issue of each volume. *All other correspondence* should be addressed to *Journal of Computational Chemistry*, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons Inc., 605 Third Avenue, New York, NY 10158.

The contents of this journal are indexed in the following: *Chemical Abstracts, Chemical Titles, Current Contents/Physical, Chemical, & Earth Sciences, Mathematical Reviews, Research Alert (ISI), Science Citation Index (ISI),* and *SCISEARCH Database (ISI).*

This paper meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of paper).

Hydrogen bonding, in ethanediol, 133
Hydrogen bonding, in protein–DNA complexes, 1712
Hydrogen bonding, in 2-trifluoromethylphenol, 1804
Hyperconjugation, in molecular mechanics, 747

Infared data, chemometric analysis of, 167
Integration schemes, for a unit sphere, 1152
Interactions, fast lookup tables for, 1857

Lattice modeling, for proteins, 1025
Lennard-Jones parameters, via *ab initio* methods, 386
Lipids, unsaturated, conformations of, 1013
Lipopolysaccharide structure, model for, 238

Maltose, molecular dynamics calculations on, 1068
Merck force field, for molecular mechanics calculations, 490, 587
Methyl carbocation, *ab initio* calculations on reaction with acetylene, 905
MM4 force field, for molecular mechanics calculations, 642, 669
Molecular–*ab initio*, mixed calculations of metal complexes of biomolecules, 1481
Molecular dynamics, bidirectional, 1564
Molecular dynamics, constrained NMR interpretations, 409
Molecular dynamics, of a protein in water, 878
Molecular dynamics, of lipopolysaccharides, 238
Molecular dynamics, parallel computing in, 326

Molecular dynamics calculations, on cyclopentane, 1541
Molecular dynamics calculations, on maltose, 1068
Molecular dynamics calculations, on polymer chains, 1685
Molecular dynamics calculations, on proteins, 469
Molecular dynamics calculations, on rhinovirus capsid, 191
Molecular dynamics/quantum mechanics, mixed calculations, 1287
Molecular mechanics, calculations, Merck force field for, 587
Molecular mechanics, density functional treatment of water, 19
Molecular mechanics, efficient calculation of electrostatics and hydration in, 864
Molecular mechanics, enantio-selective binding with, 931
Molecular mechanics calculations, for conjugated hydrocarbons, 695
Molecular mechanics calculations, formulation of derivatives, 1132
Molecular mechanics calculations, location of transition states in, 888
Molecular mechanics calculations, Merck force field for, 490, 520
Molecular mechanics calculations, MM4 force field for, 642, 669
Molecular mechanics calculations, of hyperconjugation, 747
Molecular mechanics calculations, on carbocations, 1406
Molecular mechanics calculations, on carbohydrates, 450
Molecular mechanics calculations, on charged nitrogen compounds, 1395
Molecular mechanics calculations, on conjugated amides, 396
Molecular mechanics calculations, on cytosine dimer, 841
Molecular mechanics calculations, on fullerene complexes, 1624
Molecular mechanics calculations, on fullerenes, 1387
Molecular mechanics calculations, on 1-palmitoyl-2-linoleoyl-phosphatidylcholines, 1013
Molecular mechanics calculations, on papain, 1328
Molecular mechanics calculations, on phosphines, 940
Molecular mechanics calculations, universal force field for, 616
Molecular mechanics calculations, vibrational frequencies from, 553, 730
Molecular mechanics methods, comparison of, 429
Molecular shapes, comparison of, 1653
Molecular structure, calculations of from experimental data, 74
Molecular surface area, 962, 970
Molecular volume, calculation of, 1612
Monte Carlo, density functional treatment of water, 19
Monte Carlo calculations, of lipopolysaccharide structures, 238
Monte Carlo calculations, on proteins, 1002
Monte Carlo calculations, on proteins absorbed on surfaces, 1783
Monte Carlo calculations, with parallel computing, 250
Monte Carlo method, self-avoiding random walk in, 1750
Multipole method, DNA calculations for, 976
Multipole method, for polypeptide chain, 1033

NMR interpretations, molecular dynamics constrained, 409
Non-bonded interactions, fast lookup tables for, 1857
Nucleic acids, distance geometry calculations on, 910

Papain, molecular mechanics calculations on, 1328
Parallel computing, for *ab initio* calculations, 992
Parallel computing, for protein–DNA studies, 1712
Parallel computing, for protein molecular dynamics, 469
Parallel computing, in molecular dynamics, 326
Parallel computing, in protein structure refinement, 1217
Parallel computing, Monte Carlo, 250
Parallel computing, of Hartree-Fock procedures, 109, 124
Partition functions, for hindered rotors, 954
Peptides, docking of, 418
Peptides, hydration of, 1549
Peptides, multipole representation of, 1033
Phenylnitrene, configuration interaction calculations on, 42
Phosphine derivatives, molecular mechanics calculations on, 940
Poisson-Boltzmann equation, for electrostatic binding energy, 350
Poisson Boltzmann equation, for free energy of solvation, 273
Poisson-Boltzmann equation, solution of, 1344
Polymers, self-avoiding random walk in, 1750
Polypeptides, native structures of, 1453
Potential energy surface, exploration of, 289
Principal component analysis, for reaction pathways, 1197
Protein, pK_as, solvation model for, 1229
Protein calculations, simulated annealing in, 476
Protein folding, model for, 226
Protein structure, calculations of from experimental data, 74
Protein structure, tertiary, model for, 226
Protein-DNA complexes, hydrogen bonding in, 1712
Proteins, adsorption of onto charged surfaces, 1783
Proteins, calculations of binding free energies of, 1587
Proteins, efficient computation of electrostatics and hydration, 864
Proteins, electrostatic potentials for, 790
Proteins, hydration on, 1549
Proteins, ionization states of, 1633
Proteins, lattice modeling of, 1025
Proteins, loop problem in, 1002
Proteins, molecular dynamics calculations on, 469
Proteins, molecular dynamics of, in water, 878
Proteins, native structures of, 1453
Proteins, side-chain conformational prediction in, 1667
Proteins, structure refinement of, 1217
Pyrrolizidine alkaloids, *ab initio*, semiempirical, and molecular mechanics calculations, on, 156

Radical cations, 1309
Reaction field theory, *ab initio* and semi-empirical, 806

Reaction pathways, multivariate methods analysis of, 1197
Rhinovirus capsid, molecular dynamics calculations on, 191

Scattering matrices, algorithm for, 1559
Semiempirical calculations, configuration interaction in, 178
Semiempirical calculations, of IR spectra of silicon alloys, 306
Semiempirical calculations, of electron transfer, 204
Semiempirical calculations, of electrostatic potentials, 87
Semiempirical calculations, of free energy of solvation, 273
Semiempirical calculations, of superacidity, 30
Semiempirical calculations, on 1,4-bis[2(3,4,5-trimethoxyphenyl)ethenyl]benzene, 1245
Semiempirical calculations, on carbohydrates, 1371
Semiempirical calculations, on 2,5-dimethyoxy-1,4-bis[2-(2,4-dimethoxyphenyl)ethenyl] benzene, 1820
Semiempirical calculations, on the Stevens rearrangement, 1444
Semiempirical calculations, using second derivatives in semiempirical methods, 1318
Serine diamide, *ab initio* calculations on, 821
Silaacetylene, *ab initio* calculations on, 781
Silicon alloys, calculation of infrared spectra of, 306
Siloxanes, cyclic, *ab initio* calculations on, 1163
Similarties, among atoms in molecules, 1352
Simulated annealing, in protein calculations, 476, 1002
Simulated annealing, in protein structure refinement, 1217
Solvation, analytical derivatives for continuum model, 57
Solvation, continuum model for amino acid pK_as, 1229
Solvation, continuum model for water, 148
Solvation, effect on acidities, 185
Solvation, free energy calculations of, 273
Solvation, free energy of, by the self-consistent reaction field method, 806
Solvation, of OH^- and H_3O^+ in water, 1099
Solvation, of proteins and peptides, 1549
Solvation effects, on Stevens rearrangement, 1444
Sphere, integration schemes for, 1152
Steric size, calculations of, 1612
Stevens rearrangement, solvation effects on, 1444
Stochastic methods, for conformational searching, 1171
Structure, calculations of from experimental data, 74
Superacidity, of Brönsted acids, 30
Surface area, molecular, 962, 970

Thermodynamic integration, new algorithm for free energy, 1726
Thiothionylfluoride, density functional theory calculations on, 835
Transition metals, basis sets for, 1359
Transition states, location of in various coodinate systems, 888
Transition states, optimization of using redundant internal coordinates, 49
2-trifluoromethylphenol, hydrogen bonding in, 1804

Universal force field, for molecular mechanics calculations, 616

Valence bond calculations, improvements in, 313
Vanadium (V) oligomers, *ab initio* calculations on, 1183
Van der Waal molecules, intensities of IR spectra of, 1338
van der Waals complexes, dissociation of, 919
Van der Waals, interactions, in molecular mechanics, 520
Vibrational calculations, for large molecules, 1645
Vibrational frequencies, for molecular mechanics calculations, 553, 730
Vibrational spectra (IR), intensities of for the van der Waals molecules, 1338

Water, density functional, molecular mechanics-Monte Carlo treatment of, 19
Water, models for in supercritical region, 1757
